

GEO'S ROLE AS A SERVICE PROVIDER TO U.S. IMMIGRATION AND CUSTOMS ENFORCEMENT

- GEO provides safe, humane, and high-quality support services on behalf of U.S. Immigration and Customs Enforcement (ICE) and all ICE Processing Centers managed by GEO follow the federal government's detention standards.
- In addition to a safe and humane environment, GEO provides critical services to those entrusted to our care at the ICE Processing Centers we manage, including:
 - Access to legal services, including legal libraries and Lexus Nexus software, legal rights presentations, attorney visitation rooms and meetings spaces, and on-site immigration courts.
 - Personal and group religious worship opportunities for all denominations, which are facilitated by on-staff facility chaplains who administer religious programming and facilitate interactions with volunteer ministry personnel.
 - Three high-quality meals, based on menus that are approved by ICE and by a registered dietician, with input from residents.
 - Enhanced recreational amenities, including artificial turf soccer fields, covered pavilions, exercise equipment, flat screen TVs in living areas, and leisure and legal libraries.
 - Faith and character-based programming, academic programming, cognitive behavioral treatment, substance abuse treatment and life skills training through collaborative and self-directed learning platforms.
 - Access to tablets that are enabled for video visitation for family and attorneys, sending emails, filing grievances, watching news and entertainment, listening to music and audiobooks, and self-directed educational programs.
- As a service provider to ICE, GEO plays no role in decisions related to the assignment, transfer, or release of individuals to or from ICE Processing Centers, nor do we play a role in the adjudication and/or determination of outcomes related to the cases of individuals going through the immigration review process. These decisions are made exclusively by government officials and the courts.
- GEO's ICE Processing Centers are accredited by the American Correctional Association and the National Commission on Correctional Health Care.

GEO provides health care services at a number of the ICE Processing Centers that we manage. At the Centers where GEO does not provide health care services, such services are administered directly by the federal government’s ICE Health Service Corps (IHSC).

GEO’s health care services provide individuals with around-the-clock access to medical care, including access to a cadre of medical professionals such as physicians, nurses, dentists, psychologists, and psychiatrists, as well as referrals to off-site medical specialists, imaging facilities, and local community hospitals as needed.

ICE Processing Centers where GEO Provides Health Care Services

1. Adelanto ICE Processing Center (CA)
